# Preliminary March 2025 Weather Summary for West Central and Southwest Florida

In March 2025 we've seen a wide range of temperatures, with a few days where temperatures averaged about 10° above normal, while there have been a few other days that were about 10° below normal. For the month so far, temperatures are averaging from about 1°F below normal to 1°F above normal across the area with none of the official locations on track to end up in the Top Ten Warmest or Coolest for March.

Graphics Source: High Plains Regional Climate Center (HPRCC)

As for rainfall we saw a few cold fronts move across the region, and they did bring rain to some locations, but many areas are running below normal for the month as can be seen by all the orange and red areas on the "Percent of Normal" image below right.

Rainfall March 1-29, 2025

Percent of Normal
