	04/30/12 19:30 CST		0	Flood (due to Heavy Rain)
	04/30/12 23:59 CST		0	Source: Official NWS Observations
The Verdigris River near Lenapah rose above its flood stage of 30 feet at 8:30 pm CDT on April 30th. This flood continued through May 2nd, following a crest of 35.73 feet on May 1st, which resulted in moderate flooding.				

Storm Data and Unusual Weather Phenomena - April 2012

Location	Date/Time	Deaths & Injuries	Property & Crop Dmg	Event Type and Details
----------	-----------	----------------------	------------------------	------------------------

Widespread and persistent heavy rainfall along a stationary frontal boundary stretching across northeastern Oklahoma and southeastern Kansas resulted in five to eight inch rainfalls across the region from April 29th through May 1st. This heavy rainfall resulted in moderate flooding of the Verdigris River near Lenapah.
