Much of northeastern Oklahoma received below average rainfall during September 2018. Some areas only received between a half inch and two inches of rain during the month, which corresponds to 25 to 50 percent of the normal average rainfall for the area for September. These conditions allowed severe drought (D2) conditions to persist through September across portions of Osage, Washington, and Tulsa Counties.

Portions of E 131st Street South between S Memorial Drive and S Mingo Road were closed due to flooding. Portions of S Mingo Road south of E 131st Street South were also flooded and closed.

A slow-moving upper level storm system and associated surface cold front moved into the Southern Plains on the 20th and 21st. Widespread showers and thunderstorms developed along and ahead of the front. Some of these thunderstorms moved slowly and produced locally heavy rainfall repetitively over the same areas, which resulted in flash flooding across portions of Tulsa County.
